

Preschool Focus October 2021

Through the preschool focus our aim is to share activities and ideas over the forthcoming weeks so that you can understand some things the children will be learning or working towards within the preschool room and how you can help at home.

Some activities we will do at nursery:

- Making some resources and creative items to display in the preschool room.
- Activities that allow children to talk about what they are doing.
- Start activities and tidy up when complete.
- Practical life activities such as pouring or spooning rice from one container to the next.
- Number songs and small circle times.
- Exploring golden rules in the preschool room.
- Listening and sound games.
- Familiar object labelling and using sounds for example sssss snake, car makes vroommmm sound, modelling pronunciation, shape and tongue to practice sounds.
- Stories, exploring fiction and non-fiction books.

If you would like any further support or help or would like to arrange some feedback about the preschool experiences, please do not hesitate to speak to Tracy Please keep an eye out weekly for updates on the ILD or through feedback.

What you can try at home

Promoting independence skills, Can your child select their own clothes or coat from the stand?

With winter sniffles creeping in, can your little one find a tissue and wipe their own nose.

Pouring and filling activities, using small cups to transfer water or rice using a spoon from one cup to the next.

Embrace the change in season to explore walks, crunchy leaves, changes in temperatures, clothing, discuss and talk about this.

Follow your child's interests and take time to explore these with no distractions.

Build a love for reading, sharing stories and our newly introduced book bags.
