

Nursery Life

August 2020

Throughout the nursery we have been exploring our physical skills through activities such as yoga, number stepping stones and using the bikes and trikes.

Physical, mathematics,
understanding the world

We have been making boats, lollies and painting with flowers to follow our summer theme. We've been fruit painting and exploring fruits using touch and smell.

Expressive art and design,
understanding the world

We have continued to practise our letters and numbers through mark making, activities in the pre-school room and using the interactive board for hand-eye co-ordination and maths games. During which, we have naturally practised turn taking and learning to help and support our peers. We have also had great fun on the bouncy castle and party games to celebrate all of our school leavers

making relationships, physical, literacy, technology, mathematics, social and emotional
